EXCLUSIVE

 **TASSTA**
PARTNER IN DENMARK

Tassta Partner in Denmark

We are pleased to announce that we have become the exclusive TASSTA Partner in Denmark. We are proud to add Tassta to our portfolio and look forward to delivering this innovative and future-proof solution to more customers in 2022.

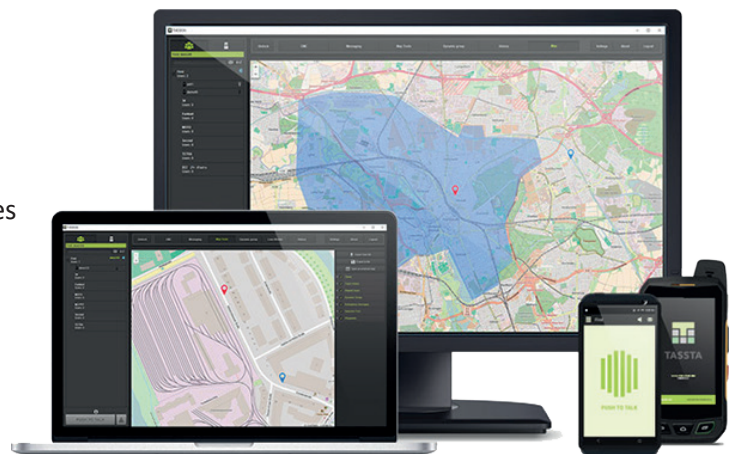

Tassta is an app-based solution for professionals who require secure and efficient mission-critical communication every day. It is an all-in-one solution that enables the use of your smartphone or tablet for push-to-talk communication over LTE and conventional networks. The system provides push-to-talk video, GPS and indoor positioning, task management, network integration, lone worker functionality, and much more.

T.Flex is TASSTA's application designed for smartphones and tablets. The system runs on IP networks (2G/3G/4G/WiFi) and is powered by the most popular operating systems, Android and iOS. It provides users with maximum operational capability through a modern user interface and high availability, even on slow data networks.

T.Flex offers always-on push-to-talk (PTT) functionality, messaging, status updates, voice recording, and GPS location management.

Learn more about T.Flex, T.Rodon, and the other features the TASSTA system offers in our TASSTA catalog, which you can find under product catalogs on our website.
